Editors

Professor Roland W. Lewis
School of Engineering, University of Wales Swansea,
Swansea SA2 8PP, UK (*E-mail:* ijnmeuk@wiley.co.uk)

Professor Ted Belytschko
Department of Mechanical Engineering, Northwestern University
Evanston, IL 60208, USA (*E-mail:* ijnme-us@northwestern.edu)

Associate Editors

Professor René de Borst
Koiter Institute Delft, Delft University of Technology
P.O. Box 5058, NL-2600 GB Delft, The Netherlands
(*E-mail:* ijnme@LR.TUDelft.nl)

Professor Charbel Farhat
Department of Mechanical Engineering and Institute for Computational and Mathematical Engineering, Stanford University, Stanford,
CA 94305, USA (*E-mail:* cfarhat@stanford.edu)

Founding Editors

Professor O. C. Zienkiewicz
Department of Civil Engineering, University of Wales Swansea,
Swansea SA2 8PP, UK

Professor R. H. Gallagher†

Editorial Board

J. S. Arora
University of Iowa,
Iowa City, USA

R. J. Astley
University of Southampton, UK

I. Babuska
University of Texas at Austin, USA

K. J. Bathe
MIT, Cambridge, MA, USA

J. L. Batoz
Universite de Technologie Compiegne,
Compiegne, France

Z. P. Bažant
Northwestern University,
Evanston, IL, USA

M. P. Bendsoe
Technical University of Denmark,
Lyngby, Denmark

D. Beskos
University of Patras, Greece

G. F. Carey
University of Texas at Austin, USA

J. L. Chenot
ENSM de Paris, Valbonne, France

Y. K. Cheung
University of Hong Kong

R. W. Clough
University of California,
Richmond, CA, USA

G. Comini
Universita degli Studi di Udine, Italy

C. A. Felippa
University of Colorado, Boulder, USA

J. Fish
Rensselaer Polytechnic Institute, USA

P.-L. George
INRIA, Le Chesnay, France

M. Géradin
ISIS, JRC, Ispra, Italy

R. Haber
University of Illinois at
Urbana-Champaign, IL, USA

R. T. Haftka
Aerospace Eng, Mech & Eng Sci,
Gainesville, FL, USA

T. K. Hellen
Oakfield House, Bristol, UK

T. J. R. Hughes
University of Texas at Austin, USA

S. Idelsohn
Universidad Nacional del Litoral,
Argentina

M. Kleiber
Polish Academy of Sciences, Warsaw,
Poland

P. Le Tallec
Université Paris Dauphine and l'Ecole
Polytechnique, Palaiseau, France

X. K. Li
Dalian University of Technology,
People's Republic of China

W. K. Liu
Northwestern University,
Evanston, IL, USA

G. Maier
Polytechnic of Milan, Italy

H. A. Mang
Technische Universität Wien, Austria

K. Morgan
University College of Swansea, UK

Z. Mroz
Polish Academy of Sciences,
Warsaw, Poland

A. K. Noor
Old Dominion University,
Hampton, VA, USA

J. T. Oden
University of Texas at Austin, USA

R. Ohayon
CNAM, Paris, France

J. Oliver
Technical University of Catalonia,
Barcelona, Spain

E. Oñate
Universidad Politécnica de Catalunya,
Barcelona, Spain

M. Ortiz
California Institute of Technology,
Pasadena, CA, USA

K. C. Park
University of Colorado, Boulder, USA

D. Peric
University of Wales Swansea, UK

E. Ramm
Stuttgart University, Germany

J. N. Reddy
Texas A&M University,
College Station, TX, USA

K. Runesson
Chalmers University of Technology,
Göteborg, Sweden

S. Saigal
Carnegie Mellon University,
Pittsburgh, PA , USA

A. Samuelsson
Chalmers Tekniska Högskola,
Göteborg, Sweden

B. Schrefler
Universita di Padova, Italy

M. S. Shephard
Rensselaer Polytechnic Institute,
Troy, NY, USA

E. Stein
University of Hannover, Germany

R. L. Taylor
University of California, Berkeley, USA

N. P. Weatherill
University of Wales Swansea, UK

P. Wriggers
University of Hannover, Germany

G. Yagawa
University of Tokyo, Japan

Advisory Board

M. Ainsworth
University of Strathclyde,
Glasgow, UK

M. H. Aliabadi
Imperial College, UK

F. Armero
University of California, Berkeley, USA

F. Auricchio
Universitá di Pavia, Italy

D. J. Benson
University of California, San Diego, USA

M. A. Bradford
University of New South Wales,
Australia

J. S. Chen
University of California at Los Angeles
(UCLA), Los Angeles, USA

A. Combescure
LaMCos INSA de Lyon,
Villeurbanne, France

L. Franca
University of Colorado, Denver, USA

D. Givoli
Technion, Haifa, Israel

I. Harari
Tel Aviv University, Israel

A. Huerta
Universidad Politecnica de Catalunya,
Spain

G. M. Hulbert
The University of Michigan, USA

T. A. Laursen
Duke University, Durham,
NC, USA

J. Peraire
Massachusetts Inst of Technology, USA

C. Schwab
ETH Zuerich, Switzerland

O. Sigmund
Technical University of Denmark,
Lyngby, Denmark

P. Steinmann
Universität Kaiserslautern, Germany

K. K. Tamma
University of Minnesota, USA

E. Van der Giessen
University of Groningen, The Netherlands

L. C. Wrobel
Brunel University, UK

N. J. Zabaras
Cornell University, USA

International Journal for
Numerical Methods in Engineering

Volume 63 Number 1 • 7 May 2005

Adaptive remeshing in large plastic strain with damage: H. Borouchaki, P. Laug, A. Cherouat and K. Saanouni 1

Parallel DSMC method using dynamic domain decomposition: J.-S. Wu and K.-C. Tseng 37

Non-local damage model based on displacement averaging: M. Jirásek and S. Marfia 77

Triangular checkerboard control using a wavelet-based method in topology optimization: G. H. Yoon and Y. Y. Kim 103

Accelerated convergence in TLM algorithms for the Laplace equation: D. de Cogan, W. J. O'Connor and X. Gui 122

Trefftz indirect methods for plane piezoelectricity: W. G. Jin, N. Sheng, K. Y. Sze and J. Li 139

Volume 63 Number 2 • 14 May 2005

Computational issues in large strain elasto-plasticity: an algorithm for mixed hardening and plastic spin: F. J. Montáns and K. J. Bathe 159

Insight into the flow-condition-based interpolation finite element approach: solution of steady-state advection–diffusion problems: H. Kohno and K. J. Bathe 197

Large-scale parallel finite-element analysis using the Internet: a performance study: R. Shioya and G. Yagawa 218

A new hybrid method for solving linear–non-linear systems of equations: S. A. Lukasiewicz and M. H. Hojjati 231

Treatment of discontinuity in the reproducing kernel element method: H. Lu, D. W. Kim and W. K. Liu 241

Advances in tetrahedral mesh generation for modelling of three-dimensional regions with complex, curvilinear crack shapes: J. Zuo, X. Deng and M. A. Sutton 256

A finite element method for the computational modelling of cohesive cracks: J. Mergheim, E. Kuhl and P. Steinmann 276

Stress analysis around crack tips in finite strain problems using the eXtended finite element method: G. Legrain, N. Moës and E. Verron 290

The *International Journal for Numerical Methods in Engineering* is covered by the following abstracting and indexing services:

Applied Mechanics Reviews, BHRA Fluid Engineering Centre (Elsevier), Cambridge Scientific Abstracts/Materials Information, CompuMath Citation Index® (ISI), Current Contents®/Engineering, Computing & Technology (ISI), Earthquake Engineering Abstracts (NISEE), Ei COMPENDEX PLUS, Ei Page One, Geobase (Elsevier), Geotechnical Abstracts (Geotext Services), Indian Society of Earthquake Technology Bulletin, INSPEC, International Aeronautical Abstracts & Database (AIAA), International Civil Engineering Abstracts (Emerald), International Petroleum Abstracts, ISI Alerting Services, Materials Science Citation Index (ISI), Mathematical Reviews, Mechanics, PASCAL Database (INIST), Science Citation Index Expanded (also known as SciSearch®) (ISI), Science Citation Index® (ISI), Shock & Vibration Digest (Sage), Tribology and Corrosion Abstracts, Zentralblatt für Mathematik/Mathematics Abstracts.

IJNMBH 63 1–2200 (2005) • ISSN 0029-5981

Volume 63 Number 3 • 21 May 2005

A triangular hybrid equilibrium plate element of general degree: E. A. W. Maunder and J. P. Moitinho de Almeida 315

Simple modifications for stabilization of the finite point method: B. Boroomand, A. A. Tabatabaei and E. Oñate 351

Steady and unsteady incompressible flow in a double driven cavity using the artificial compressibility (AC)-based characteristic-based split (CBS) scheme: P. Nithiarasu and C.-B. Liu 380

A FETI-DP method for the parallel iterative solution of indefinite and complex-valued solid and shell vibration problems: C. Farhat, J. Li and P. Avery 398

Comparison of numerical methods for identification of viscoelastic line spectra from static test data: S. Gerlach and A. Matzenmiller 428

Tricubic interpolation in three dimensions: F. Lekien and J. Marsden 455

Volume 63 Number 4 • 28 May 2005

A practical large-strain solid finite element for sheet forming: J. Wang and R. Wagoner 473

A CBS-type stabilizing algorithm for the consolidation of saturated porous media: V. A. Salomoni and B. A. Schrefler 502

Moving least-square interpolants in the hybrid particle method: H. Huang, S. Saigal and C. T. Dyka ... 528

On the numerical implementation of 3D rate-dependent single crystal plasticity formulations: X. Ling, M. F. Horstemeyer and G. P. Potirniche 548

Comparison between element, edge and compressed storage schemes for iterative solutions in finite element analyses: F. L. B. Ribeiro and A. L. G. A. Coutinho 569

Structural shape optimization using equivalent static loads transformed from dynamic loads: K. J. Park, J. N. Lee and G. J. Park 589

A direct finite element implementation of the gradient-dependent theory: R. K. Abu Al-Rub and G. Z. Voyiadjis 603

Volume 63 Number 5 • 7 June 2005

An energy-conserving scheme for dynamic crack growth using the eXtended finite element method: J. Réthoré, A. Gravouil and A. Combescure 631

The hybrid boundary node method accelerated by fast multipole expansion technique for 3D potential problems: J. Zhang, M. Tanaka and M. Endo 660

Fast time-domain simulation for large-order linear time-invariant state space systems: K. C. Sou and O. L. de Weck 681

Influence functions and goal-oriented error estimation for finite element analysis of shell structures: T. Grätsch and K-J. Bathe 709

A kernel free particle-finite element method for hypervelocity impact simulation: Y-K. Park and E. P. Fahrenthold 737

Analysis of three-dimensional crack initiation and propagation using the extended finite element method: P. M. A. Areias and T. Belytschko 760

Volume 63 Number 6 • 14 June 2005

A natural neighbour Galerkin method with quadtree structure: J. J. Laguardia, E. Cueto and M. Doblaré 789

A new dual mortar method for curved interfaces: 2D elasticity: B. Flemisch, M. A. Puso and B. I. Wohlmuth 813

A fast implementation of the FETI-DP method: FETI-DP-RBS-LNA and applications on large scale problems with localized non-linearities: J. Sun, P. Michaleris, A. Gupta and P. Raghavan 833

Topology optimization using non-conforming finite elements: three-dimensional case: G.-W. Jang, S. Lee, Y. Y. Kim and D. Sheen 859

Vertex-to-face contact searching algorithm for three-dimensional frictionless contact problems: J.-H. Wu, C. H. Juang and H.-M. Lin 876

Modelling of reinforced polymer composites subject to thermo-mechanical loading: M. R. E. Looyeh, A. Samanta, S. Jihan and J. McConnachie 898

Stable algorithm for the stress field around a multiply branched crack: J. Englund 926

Volume 63 Number 7 • 21 June 2005

Stability and accuracy of finite element methods for flow acoustics. I: General theory and application to one-dimensional propagation: G. Gabard, R. J. Astley and M. B. Tahar 947

Stability and accuracy of finite element methods for flow acoustics. II: Two-dimensional effects: G. Gabard, R. J. Astley and M. B. Tahar 974

Efficient finite element formulation for geothermal heating systems. Part 1: Steady state: R. Al-Khoury, P. G. Bonnier and R. B. J. Brinkgreve 988

Numerical simulation of thermomechanical behaviours of shape memory alloys via a non-linear mesh-free Galerkin formulation: K. M. Liew, J. Ren and J. N. Reddy 1014

High-order Higdon-like boundary conditions for exterior transient wave problems: V. J. van Joolen, B. Neta and D. Givoli 1041

A new discontinuous upper bound limit analysis formulation: K. Krabbenhoft, A. V. Lyamin, M. Hjiaj and S. W. Sloan 1069

Volume 63 Number 8 • 28 June 2005

A globally convergent numerical algorithm for damaging elasto-plasticity based on the Multiplier method: L. Contrafatto and M. Cuomo 1089

The natural neighbour Petrov–Galerkin method for elasto-statics: K. Wang, S. Zhou and G. Shan 1126

Element-wise *a posteriori* estimates based on hierarchical bases for non-linear parabolic problems: J. de Frutos and J. Novo 1146

Finite element shakedown analysis of two-dimensional structures: G. Garcea, G. Armentano, S. Petrolo and R. Casciaro 1174

Refined discrete quadrilateral degenerated shell element by using Timoshenko's beam function: C. Wanji and Y. K. Cheung 1203

Erratum 1228

Volume 63 Number 9 • 7 July 2005

Performance-based design sensitivity analysis of steel moment frames under earthquake loading: Y. Gong, L. Xu and D. E. Grierson 1229

On optimal contact shapes generated by wear: I. Páczelt and Z. Mróz 1250

Force identification of dynamic systems using genetic programming: Y. W. Wang, C. Wang and C. K. Soh 1288

On advanced solution strategies to overcome locking effects in strong discontinuity approaches: J. Mosler 1313

A spatially curved-beam element with warping and Wagner effects: Y.-L. Pi, M. A. Bradford and B. Uy 1342

Volume 63 Number 10 • 14 July 2005

A variationally consistent fractional time-step integration method for incompressible and nearly incompressible Lagrangian dynamics: S. K. Lahiri, J. Bonet, J. Peraire and L. Casals 1371

Geometrical numerical algorithms for a plasticity model with Armstrong–Frederick kinematic hardening rule under strain and stress controls: C.-S. Liu and C.-F. Li 1396

A new methodology to solve non-linear equation systems using genetic algorithms. Application to combined cycle gas turbine simulation: A. Rovira, M. Valdés and J. Casanova 1424

Selective mass scaling for explicit finite element analyses: L. Olovsson, K. Simonsson and M. Unosson 1436

Analysis of transient flow in pipelines with fluid–structure interaction using method of lines: Y. L. Zhang and K. Vairavamoorthy 1446

Simulation of strength difference in elasto-plasticity for adhesive materials: R. Mahnken and M. Schlimmer 1461

On the reinitialization procedure in a narrow-band locally refined level set method for interfacial flows: P. Gómez, J. Hernández and J. López 1478

Volume 63 Number 11 • 21 July 2005

Error estimates of local multiquadric-based differential quadrature (LMQDQ) method through numerical experiments: H. Ding, C. Shu and D. B. Tang 1513

Fully tensorial nodal and modal shape functions for triangles and tetrahedra: M. L. Bittencourt 1530

Adaptivity for structured meshfree particle methods in 2D and 3D: T. Rabczuk and T. Belytschko 1559

Steady state finite element simulation of bar rolling processes based on rigid-viscoplastic approach: S. Y. Kim, H. W. Lee, J. H. Min and Y. T. Im 1583

Adaptive superposition of finite element meshes in elastodynamic problems: Z. Yue and D. H. Robbins Jr 1604

Solving high-order partial differential equations with indirect radial basis function networks: N. Mai-Duy and R. I. Tanner 1636

Volume 63 Number 12 • 28 July 2005

Computational modelling of plasticity induced by martensitic phase transformations: A. S. J. Suiker and S. Turteltaub 1655

A direct constraint-Trefftz FEM for analysing elastic contact problems: K. Y. Wang, Q. H. Qin, Y. L. Kang, J. S. Wang and C. Y. Qu 1694

Utilizing prior information in the estimation of volume fraction distribution: L. M. Heikkinen, R. M. West and M. Vauhkonen 1719

Three-dimensional steady thermal stress analysis by triple-reciprocity boundary element method: Y. Ochiai 1741

Hybrid control of irregular steel highrise building structures under seismic excitations: H. Kim and H. Adeli 1757

An accelerated surface discretization-based BEM approach for non-homogeneous linear problems in 3-D complex domains: J. Ding, W. Ye and L. J. Gray 1775

Volume 63 Number 13 • 7 August 2005

A dual mesh multigrid preconditioner for the efficient solution of hydraulically driven fracture problems: A. P. Peirce and E. Siebrits 1797

Numerical simulation of fatigue-driven delamination using interface elements: P. Robinson, U. Galvanetto, D. Tumino, G. Bellucci and D. Violeau 1824

Conservation properties of a time FE method. Part IV: Higher order energy and momentum conserving schemes: M. Groß, P. Betsch and P. Steinmann 1849

Efficient dynamic finite element method for 3D objects with uniform cross-section: Y. Onishi, M. Urago, K. Amaya and S. Aoki 1898

Bilateral filtering for structural topology optimization: M. Y. Wang and S. Wang 1911

Volume 63 Number 14 • 14 August 2005

Foreword i

A bounding surface plasticity model for cyclic loading of granular soils: N. Khalili, M. A. Habte and S. Valliappan 1939

Lower bound limit analysis with adaptive remeshing: A. V. Lyamin, S. W. Sloan, K. Krabbenhøft and M. Hjiaj 1961

Investigation of nanoscale electrohydrodynamic transport phenomena in charged porous materials: P. Pivonka and D. Smith 1975

Combining upper bound and strain path methods for evaluating penetration resistance: I. Einav and M. F. Randolph 1991

An elliptical disc anchor in a damage-susceptible poroelastic medium: A. P. S. Selvadurai and A. Shirazi 2017

Buoyancy potential conserving technique for dynamic analysis of offshore pipes and risers: M. Yazdchi 2040

Volume 63 Number 15 • 21 August 2005

Parallel eigenanalysis of multiaquifer systems: L. Bergamaschi, G. Pini and F. Sartoretto 2069

Tensor-based matrices in geometrically non-linear FEM: V. V. Chekhov 2086

An integrated procedure for three-dimensional structural analysis with the finite cover method: K. Terada and M. Kurumatani 2102

Efficient and accurate multilayer solid-shell element: Non-linear materials at finite strain: X. G. Tan and L. Vu-Quoc 2124

Explicit momentum-conserving integrator for dynamics of rigid bodies approximating the midpoint Lie algorithm: P. Krysl 2171
